

Notice of Completion

Design and Construction Report

Highway 417 Bridge Rehabilitations (GWP 4074-11-00), Detail Design

THE STUDY

The **Ministry of Transportation (MTO)** has completed the Detail Design and Environmental Assessment Study for the rehabilitation of four bridges along Highway 417 (GWP 4074-11-00), in the City of Ottawa.

The scope of work includes:

- Rehabilitation of the Highway 417 Aviation Parkway Off-Ramp (NBL) and Highway 417 Aviation Parkway On-Ramp (SBL) Overpass Bridges;
- Rehabilitation of the Highway 417 Aviation Parkway Overpass "Y" Bridge;
- Rehabilitation of the Highway 417 Walkley Road Underpass;
- Construction of a noise barrier in the vicinity of the Highway 417 westbound (WB) to OR 174 eastbound (EB) ramp; and
- Construction of related works, including pavement rehabilitation, drainage improvements, modifications to illumination/ATMS and landscaping.

Traffic management for construction staging has been coordinated with the City of Ottawa and the National Capital Commission (for the Aviation Parkway). Lane and ramp closures will be required on municipal roads and Highway 417 during construction. Full details on anticipated municipal road and highway lane and ramp closures, as well as detour routes, are documented in the Design and Construction Report (DCR).

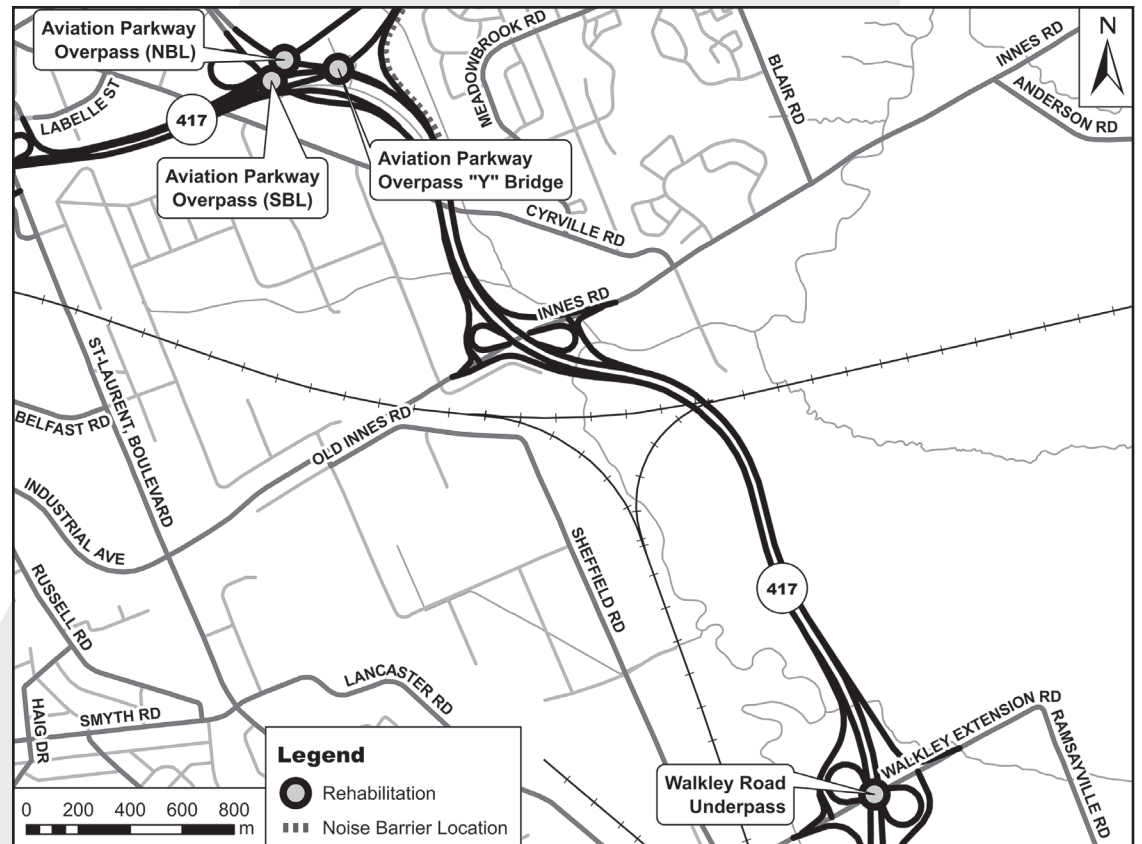

A Notice of Study Commencement was published for this Detail Design study in November 2019; however, since that time, the scope of work has been reduced. The remainder of the works identified in the November 2019 Notice of Study Commencement are being addressed under separate Detail Design and Class Environmental Assessment studies.

The preliminary design was documented in a Transportation Environmental Study Report (TESR), which received environmental clearance in 2016.

THE PROCESS

The study was carried out in accordance with the approved environmental planning process for Group 'B' undertakings under the Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000), with the opportunity for public input throughout the project.

The purpose of this notice is to inform you that a DCR has been filed and will be available from **February 14, 2022** to **March 15, 2022** for a 30-day comment period. The DCR documents the Class EA process followed, including a description of the Recommended Plan, potential environmental effects and mitigation plan. The DCR is available on the project website at www.highway417-aviationtohuntclub.com/contract2.

Interested persons are encouraged to review the DCR and provide comments by **March 15, 2022**. If there are no outstanding concerns after the 30-day comment period has expired, further documentation will not be prepared and construction may commence without further notice. If you have further questions or comments, please feel free to contact the undersigned at the addresses listed below or visit the project website at www.highway417-aviationtohuntclub.com/contract2.
